

MOIST SOILS

Although it is usually advisable to try to drain areas where water stands for any length of time, the following plants will withstand moist soil conditions better than moist. If any area is always wet, consider bog plants for the site; some of which will grow to the height of small trees.

ACER NEGUNDO 'FLAMINGO'	HIBISCUS MOSCHEUTOS CULTIVARS	RODGERSIA SPP.
ACER RUBRUM & CULTIVARS	ILEX GLABRA COMPACTA	SALIX SPP.
